EXPERIENCE

Front-end Developer - Wellbytes

April 2026 - Present

Wellbytes is a Canadian benefits technology platform that helps businesses and incorporated individuals manage Health Spending Accounts (HSAs) and Wellness Spending Accounts (WSAs) through digital onboarding, claims processing, and workflow automation.

- Maintained and improved an Angular-based CRM for managing customer records, employer accounts, claim workflows, and internal administrative operations.
- Built and integrated CRM features using Angular, TypeScript and Tailwind CSS, including form validation, reusable UI components, and business logic for benefits administration workflows.
- Supported U.S. expansion by implementing country-specific CRM logic for tax requirements, validation rules, and regional business workflows.
- Worked with sensitive customer data, helping maintain secure and reliable CRM operations.
- Converted Figma designs into responsive WordPress pages with consistent layouts and optimized user experience across screen sizes.
- Reviewed the Go-based backend architecture, service logic, and data models to strengthen full-stack understanding and support future backend contributions.

Front-end Developer Intern - Enya Learning

Oct 2025 - January 2026

Enya Learning is an education platform helping newcomer students adapt to Canadian learning and academic expectations, with tools for educators and parents to track progress and create learning content.

- Converted Figma designs into responsive interfaces using TypeScript, Next.js and Tailwind, building reusable components to speed feature delivery and maintain design consistency, resulting in faster iteration and more consistent UI across pages.
 - Integrated frontend features against existing APIs, reviewed backend code to identify contract mismatches, and partnered with backend engineers to resolve issues and restore expected functionality, reducing integration friction and preventing recurring regressions.
 - Collaborated with designers and the product manager to refine user flows and clarify requirements, ensuring smooth execution from design to implementation, reducing rework and improving delivery predictability.
 - Communicated blockers and technical issues clearly in daily meetings, explaining the impact, reproduction steps, and proposed fixes to expedite resolution and maintain delivery on track.
-

PROJECTS

Paper Trading Platform — Vite, React, TypeScript, Firebase, Alpaca APIs, Node.js

A paper trading environment where users can practice trading in a sandbox environment

- Implemented secure user registration and login with Firebase Authentication, enabling protected access to trading, portfolio, and activity features.
- Integrated Alpaca Market Data API to fetch live quotes and historical data, enabling accurate pricing and market context for user decisions.
- Integrated Alpaca Broker API in a sandbox environment to place paper trades and manage account state, enabling realistic order flow, positions, and balances.
- Display account performance data, including transactions, balances, order history, and activity, giving users clear visibility into results and trading history.

Book Explorers — React Native, Firebase, Google Books API

A mobile app to find books, view summaries, and save reading streaks

- Built a live search experience powered by the Google Books API with results and a detailed view, enabling fast browsing and richer discovery.
 - Implemented Firebase Authentication with persistent sessions, keeping users signed in across visits for a smoother experience.
 - Saved favorites to Firestore, ensuring user libraries persist across sessions and devices.
-

TECHNICAL SKILLS

Language & Frameworks: TypeScript, Angular, React, Next.js, React Native, Node.js, Tailwind CSS, Firebase, REST APIs, Express.js, Axios

Tools & Platforms: Vite, Docker, GitHub, Figma, Adobe Creative Suite, WordPress

EDUCATION

Diploma in New Media and Web Development (with Distinction)

British Columbia Institute of Technology, 2024 – 2025

INTERESTS

Video games, reading, learning, cats and animals.
